

Monte Mucho Region Bird Checklist

The furnished bird list is not a complete list of all species observed or expected in the Monte Mucho region. Instead, the list of species is one which excludes hypothetical, rare or occasional species. It is intended to more precisely indicate which species are probable or likely to be observed with diligent effort in appropriate habitat.

Compiled by Jim Hailey, February 2006. Species names and taxonomic order follow the A. O. U. *Checklist of North American Birds*. 7th edition (1998).

S = summer resident & migrant; **W** = winter resident & migrant; **M** = migrant only, spring &/or fall; **R** = resident; * = breeding; + = also found in small numbers in winter
